**A. Warning Band** Found in the border of the check, this warning band indicates the security features of the check for easy identification. Not available in all manual check styles.

**B. Security Pantographs** Our custom check backgrounds are designed to limit reproducibility by scanning or photocopying, while also ensuring check readability.

**C. Padlock Icon** This security symbol warns that the check is security protected and is found on both sides of the check, with a description of at least two of the security features on the back of the check to verify authenticity.

**D. "MP" Logo** MP, which stands for MicroPrinting, is recommended by the Check Payment Systems Association (CPSA) and is used on all our checks.

**E. MicroPrinted Signature Lines** On each signature line of our checks, we print microscopic lettering in type that is too small to be reproduced by scanning or photocopying that reads "ORIGINAL DOCUMENT."

**F. Security Screen** A security screen that reads "ORIGINAL DOCUMENT SCREEN" is found on the back of all our checks, listing all security features included on the check. This screen is unable to be photocopied clearly.
